The Companion Volume Is Ready

DISEASES OF THE LUNGS

WITH 11 COLORED PLATES AND 104 ILLUSTRATIONS, 8 VO., \$6.00 NET.

The Companion Volume to
DISEASES OF THE HEART AND ARTERIAL SYSTEM.

By ROBERT H. BABCOCK, A. M., M. D.

Attending Physician to Cook County Hospital and Cook County Hospital for Consumptives;
Fellow and Former President of the American Climatological Association, Etc.

This work has been written along practical lines, and is unquestionably an important addition to the literature upon the subject. The same clear and concise manner of expression will be found here as in the work of DISEASES OF THE HEART AND ARTERIAL SYSTEM.

The chapters devoted to Pneumonia and Tuberculosis will be found of especial interest at this time when treatment of DISEASES OF THE LUNGS is attracting international discussion.

Diagnosis and Treatment have received the consideration which their importance requires from the viewpoint of the general practitioner, and the work should prove a ready guide to the reader.
